Or **manual tools** like mails and excels which are time-consuming and have human error risk issues control

Excel spreadsheet showing a detailed grid of data, likely representing an airbill or freight manifest. The grid includes columns for various fields such as 'Shipper', 'Consignee', 'Agent', 'Origin', 'Destination', 'Date', 'Pieces', 'Act Wt', 'Total', 'Vol Wt', 'Charges', 'Remarks', and 'Pricing Information'. The data is organized into multiple rows and columns, with some cells highlighted in yellow and red, indicating specific entries or errors.

RESULT:

A manual process or emails back and forth, long time for quoting, additional expenses, poor performance and customer service, non-transparency.

SOLUTION

CargoBooking.aero offers full process automation for instant air cargo quoting and booking which can be integrated to freight forwarder systems by API.

Works as consolidator of all possible flights/truck options with customer rates and spot rates requests.

Real time flights/rates

search and pre book/spot rate quoting via customer portal, email or API.

Digitising

the current way of the manual process by emails or calls.

Faster

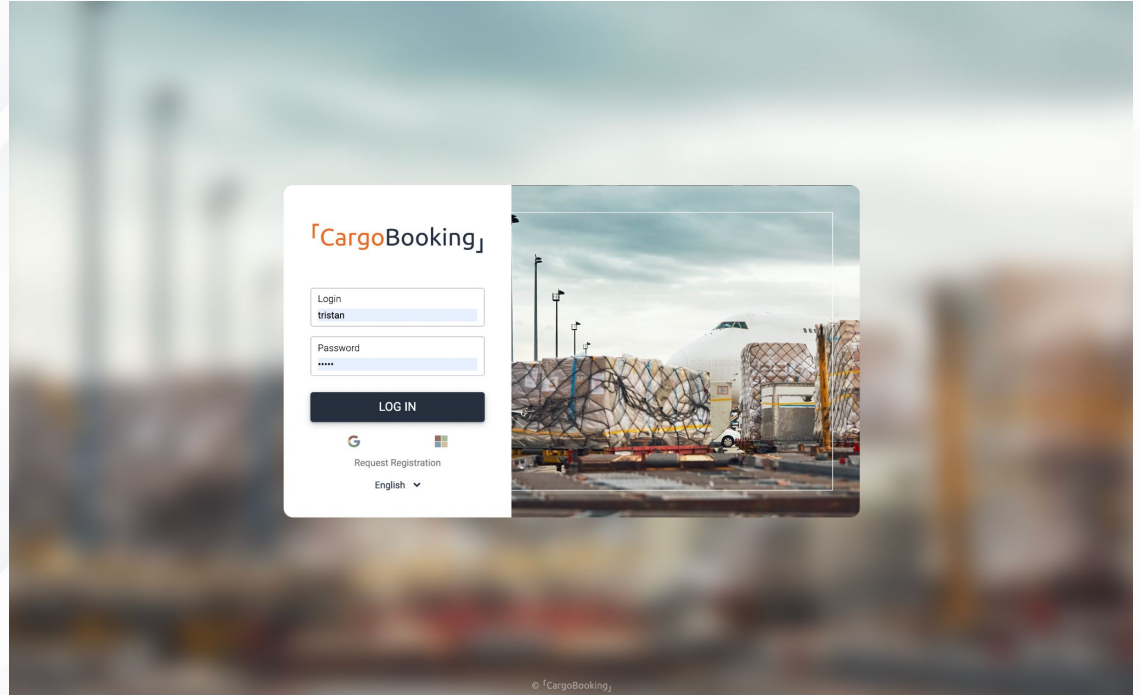

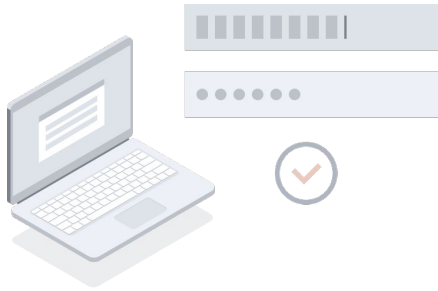

quotes and booking processing for Freight Forwarders and Airlines/Cargo GSA.

Functionality support of the full airfreight and charter sales business workflow.

More tight integration in processes with customers improved loyalty and better customer experience.

Step 1

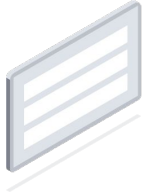

Log in with your user access

Step 2

Create a new Cargo Quote or clone any existing one.
